About Me

I am a skilled front-end developer with 1.8+ year's of experience using popular library & frameworks such as React, Next.js, and Vue.js. My experience includes creating engaging and responsive user interfaces for various projects, and I possess a strong understanding of front-end development principles such as HTML, CSS, and JavaScript. With a keen eye for design and a commitment to delivering projects on time , I am confident that I can contribute to any front-end development team.

Professional Experience

TechinoRishi Consultancy Pvt Ltd.
Software Developer *2022 – Present*
Key responsibilities:
- Develop user-friendly web applications using React , Next Js, HTML, CSS, and JavaScript to meet client requirements
- Collaborate with cross-functional teams to ensure seamless integration of front-end design with back-end functionality.
- Test and debug front-end code to ensure high-quality, error-free web applications.
- Create reusable components to improve development efficiency and reduce redundant code
- Stay up-to-date with latest front-end development trends, techniques, and technologies including state management libraries such as Redux, and implement them as necessary to improve the development process and end-product.

Projects

- **TechnoRishi Website (company Official Website)**
  I was part of developing user interface of the company's official website using Next.js, a popular React-based framework, to create a high-performance and SEO-friendly web application.

- **DRM (Digital Register Management System)**
  As a front-end developer on the team, I contributed to the development of DRM (Digital Register Management System), a comprehensive web-based system that streamlines the management of digital records for a range of clients.

- **Tr UI-Components**
  As a front-end developer, I leveraged Rollup.js and TypeScript to create and publish reusable components and packages, improving development efficiency and reducing redundant code for future projects.
